

Environment Protection Policy

Crest Air Conditioning is committed to taking any necessary steps and measures required to protect and secure our environment by seeking to minimise the impact of our activities. We will achieve this by actively implementing the following:

- Comply with environmental legislation and other applicable environmental requirements
- Proactively pursue the minimisation of environmental impacts associated with its activities, products and services by endeavouring to eliminate polluting emissions or discharges into the environment.
- Continually strive for improvement and the prevention of pollution through the environmental performance of its activities, products and services and through the integration of Crest Air Conditioning's HSEQ Objectives.

These steps include but are not limited to:

- **Waste Management:** The Company disposes of all waste in a lawful manner and with appropriate approvals.
- **Incident Management:** The Company addresses all environmental incidents immediately and establishes any appropriate control, isolation, containment and rectification procedures
- **Recycling:** The recycling of waste oil, refrigerant, paper, products and water.
- **Noise Control:** The Company is aware of noise level limitations required by appropriate legislation, codes and standards and applies noise reduction measures to construction plant as is necessary.
- **Plant and Equipment Maintenance:** As part of Crest Air Conditioning's operational controls to minimise impact on the environment, the Company has implemented a Preventive Maintenance Program on all vehicles, plant and equipment for servicing to manufacturer's specifications. This includes an assessment to minimise impact on the environment that there are no leaks or other adverse contaminants to ground or air.

Andrew Johnson
MANAGING DIRECTOR
